32TH ITI EDUCATION WEEK BERN

Synergy in Implant Dentistry – the Bernese Interdisciplinary Approach:

A 4-Day CE Course with 8 Live Surgeries & 6 Hands-On Workshops in Oral Surgery, Periodontics, Prosthetics

This 4-day evidence-based foundation course is designed for clinicians with an interest in the field of implant dentistry. This course presents evidence-based treatment concepts for the rehabilitation of fully and partially edentulous patients. Besides lectures, the participants will see several live surgeries observing how dental implants are placed, bone augmentation performed and biologic complications or soft tissue defects are treated. In addition, the course offers the opportunity of workshops in treatment planning, digital workflows, surgical periodontal and prosthetic treatment concepts. The course involves lectures presenting the underlying principles for treatment solutions and fully documented clinical cases. Several live surgeries demonstrate the placement of dental implants, bone augmentations and the treatment of biologic complications or soft tissue defects. In addition, small-group training in treatment planning, digital workflows, surgical, periodontal and prosthetic is provided in hands-on workshops.

Learning Objectives

- Comprehensive treatment planning in implant dentistry
- Advantages and challenges of digital workflows in implant dentistry
- Planning, prosthetically driven implant placement
- Alveolar ridge preservation
- Distinguish the indications for immediate, early, and late implant placement
- Biology and indication of bone regeneration in sinus floor elevation and guided bone regeneration vs. the use of narrow-diameter or short implants
- Biology of peri-implant wound healing and regeneration
- Implants in periodontally compromised patients
- Etiology, diagnosis and treatment of biologic complications at implants
- Etiology, prevention and treatment of soft tissue defects at implants
- Risk assessment and maintenance care
- Discuss biological and implant prosthodontics complications, their prevention and treatment
- Optional visit of Straumann production in Villeret on 21st August 2026

Speakers

Date	17 th –20 th August 2026, 08.30–19.00 h: ITI Education Week 21 st August 2026: Visit of Straumann production in Villeret, organised by Straumann
Place	School of Dental Medicine, Freiburgstrasse 7, 3010 Bern
Course type	Theoretical and practical course with live surgeries and hands-on workshop including coffee breaks, lunches, a certificate 35 hours of CE credit
Language	English
Events	Welcome reception 17 th August 2026, Special Dinner 19 th August 2026
Course fee	CHF 4200.– NON ITI Members CHF 3500.– ITI Members CHF 1750.– Postdocs
