

## Laboratory technician 60-80 %

Are you interested in working in a university and dental environment?

As of May 1, 2024 or upon agreement a temporary position is to be filled in the **Robert K. Schenk Laboratory for Oral Histology** of the Department of Periodontology of the zmk bern.

### Your area of responsibility

Your work includes all laboratory, organizational, and administrative tasks that arise in the context of carrying out research projects in translational (applied) dental medicine, with a focus on tissue regeneration and biomaterials. This includes, among other things:

- Histological processing (Embedding, cutting, staining)
- Microphotography and digital image processing
- Independent implementation, documentation and evaluation of experiments as part of the laboratory's own research projects
- Organization and implementation of the ordering system

### Your profile

- Completed training as a biology or medical laboratory technician
- Very good experience in histology
- Good oral and written knowledge in German (good English skills is a bonus)
- Independent, precise and responsible way of working
- Ability to work in a team, organizational skills and good communication
- Interest in applied research

We offer a professionally qualified, open-minded and team-minded person an interesting, dynamic, independent and varied job that works in close cooperation with clinicians and researchers from all walks of life. You can also expect a high degree of personal responsibility within a great working atmosphere. The working hours are regulated, the remuneration is based on a cantonal decree. Work location sitem-insel AG, Freiburgstrasse 3, Bern
